EXPERIENCE

FullStack Developer
Société FATM

📅 2024 – July   📍 Stage

- Developed a full-stack inventory management and expense tracking web application using Laravel, implementing features like user authentication, custom reporting, and real-time data updates.
- Designed and built both the front-end and back-end, ensuring seamless integration and optimized performance.

Desktop Developer
Auto-Ecole Karroum

📅 2023 – August   📍 Stage

- Designed and implemented a JavaFX-based application for managing driving school operations, including scheduling and payment tracking.
- Optimized user interface for smooth navigation and usability.

Front-End Developer
Société Sicatra

📅 2022 – July   📍 Stage

- Developed a responsive front-end app for company operations using HTML, CSS, and JavaScript.
- Collaborated with design team to enhance UI/UX and improve performance.
